Thank you for consulting the ecology team regarding this application. We have no concerns.

As per the prior application NY/2022/0277/FUL, the sports hall building has previously been evaluated as having negligible potential to support protected species. It is unlikely this has changed.

Based on the information and photographs provided in the Design & Access Statement, the extension area is an existing sealed surface so we would expect this application to be exempt from Biodiversity Net Gain requirements.

Kind regards,

Martin Hammond
