31 May 2022

Dear Sir,

Proposed: Extraction of sandstone at Gayles Quarry, near Gayles Village.

Location: Gayles Quarry, near Gayles Village, Richmondshire.

Applicant:

I refer to your consultation on the above application and confirm the Highway Authority's consultation response will be dealt with by the Transport and Development Team at County Hall.

I have arranged for the submitted documents including the transport assessment and travel plan to be checked and will contact you again once the document checking process is completed. A formal response will be issued once these checks are completed and all matters raised have been resolved

If you are arranging any meetings with the applicant, please could you inform me of the details? It would also be helpful to know your programme for determining the application.

**Section 278 Agreements**

Section 278 of the Highways Act 1980, in effect gives a Local Authority the right of first refusal to undertake the design and/or construction of works associated with a S278 Agreement. This in practice requires any Developers, where a S278 Agreement is needed, to enter into discussions with the Local Highway Authority for the provision of S278 design and construction works. Please contact Jasmin Gibson [highwaydevelopmentservice@northyorks.gov.uk](mailto:highwaydevelopmentservice@northyorks.gov.uk) at your earliest opportunity to ascertain whether the LHA will undertake the S278 design on this scheme.

Yours faithfully

Paul Roberts
