Planning Control  
NY/2025/0030/ENV

Please find my objections to the above planning application.

1. Europa seeks to address All of the environmental issues by monitoring alone. This provides no direct action or protection for residents of the villages and the town.
2. The infrastructure cannot support the added traffic. Europas plans really say 2 HGV's per hour. Or 18 per day, without stipulation of day or night travel. Scarborough's two A roads cannot support this load.
3. It will add traffic around an already busy hospital area.
4. Gaining permission for a temporary exploratory drill should be denied. A more permanent site would be devastating for the area and town and should also be denied. So there is little point to exploring the area.
