Subject: New comments for application NY/2025/0030/ENV

New comments have been received for application NY/2025/0030/ENV from Mr Andy Natrass.

Comments:

This application for "Fracking by another name" is totally at odds with the environmental challenges we face, at a time when we should be focusing on green energy not more oil and gas. In addition to the local negative environmental impact in terms of pollution of water courses etc the application should also be judged by the wider impact of greenhouse gases released when the product is used.
