Subject: New comments for application NY/2025/0030/ENV

New comments have been received for application NY/2025/0030/ENV from Mrs Natasha Pickard.

Comments:

As a young family that regularly visits this area of the coast for day-visits and holidays, we are deeply disappointed to see this application. Not only does the proposed fracking work against urgent need to minimise our impact on the climate, particularly to protect future generations, but the devastating impact this will have on the local community, landscape and traffic in the area will make the area unrecognisable.

Despite my sympathies in understanding the need for affordable energy, the minimal benefit to the UK energy market that this fracking will provide - as much will be undoubtedly be sold abroad - combined with the many negative impact that this proposal will have, means that this development will provide a net negative impact and therefore, I urge this application to be rejected.
