For the attention of Amy Taylor case officer.

Re : planning application NY /2025/0030/ENV. Europa Oil and gas.

I would like to strongly object to the above application on the following grounds;

Pollution- loud drilling, dust and light pollution 24 hours a day

Gas flaring- causing toxic fumes and smells Potential risk to our water supply

Precious farm land will be destroyed.

The Proposed Drill site is close to homes and rural villages, and this has the potential to be expand the affected area if this proposal is accepted.

The amount of HGV along urban and rural roads is completely unacceptable. These roads are not but to withstand continuous Heavy HGV use.

There is the potential for underground tremors as the proposed site is above a major fault system.

The damage to the environment by burning more co2 and methane gas increase.

The area surrounding the proposed site is an area that depends on tourism, there could be an adverse affect on the beautiful countryside, damage to wildlife, bird life and a Site of Special Scientific interest. All these could lead to a decline in visitors which will have a detrimental effect on local businesses and the local economy.

We need to protect our environment for future generations.

Local opinion should be listened to.

We will be the people left to live with the detrimental consequences should this application be approved.

Yours sincerely
