Subject: OBJECTION to planning application reference NY/2025/0030/ENV

Dear sir,

I would like to object in the strongest possible terms to planning application **NY/2025/0030/ENV**. As a local resident and business owner, I find it abhorrent that this application is even being considered. The pollution, the destruction of the heritage coast, the negative effect on tourism and above all the furthering use of fossil fuel is obscene and indefensible. I am outraged and appalled. We should be investing in ecologically friendly and sustainable energy. As an electric only household and business, I choose to get my electricity from a supplier that provide 100% renewable energy. This is the only way forward.

As a seafaring town the best idea is to make use of local resources and knowledge and expand off shore wind power along with increasing solar and looking to new renewable options.

The use of fossil fuels is utterly archaic and should be consigned to history. The only ones who benefit are the already insanely wealthy fuel companies at the cost of not only the people but the entire planet and the very future of humanity. Choose life.

Thank you.

Yrs faithfully,
Magenta shepley
