**Subject:** New comments for application NY/2025/0030/ENV

New comments have been received for application NY/2025/0030/ENV from Mr Stephen Tomlinson.

Comments:  
Ref: NY/2025/0030/ENV

Dear Sir or Madam

Notwithstanding the potential devastating results on the local environment combined with detriment to residents' health and mental wellbeing, the proposed exploration and extraction activity appears to display total disregard to the current Labour government agenda for clean energy and net zero ambition. The published Labour Manifesto (13th June 2024) records "We will not issue new licences to explore new fields because they will not take a penny off bills, cannot make us energy secure, and will only accelerate the worsening climate crisis". Fracking or Proppant Squeeze, however it is described, ultimately delivers the equivalent result, extraction and burning of any type of fossil fuel, results in increased CO2 emissions and further destruction of the planet. Additionally given the nature of the proposed development area, our perception is the application should be considered an "inappropriate development", in accordance with the UK national planning policy framework.
