Subject: Objection to application NY/2025/0030/ENV
Date: 13 March 2025 14:42:24

This is an objection to NY/2025/0030/ENV

Location:

Land East of the Mill Yard, Burniston Mill, Coastal Road, Burniston, Scarborough, YO13 0DB

Proposal:

Construction of a temporary wellsite for the appraisal of gas, including drilling operation, proppant squeeze and flow testing operation and site restoration

(I tried to submit this online in the normal way but ReCaptcha said that I had not entered a first name or selected a type of comment, although I had clearly done both and tried to redo it several times. You need to find a way round this glitch in the technology.)

I object to this application primarily on climate change grounds. There is a legal obligation to reduce climate changing emissions and this application will increase them, as is shown by their own documents. We need urgently to move away from fossil fuels. Additionally the project would significantly affect the local area in terms of vehicle movements (noise, danger and emissions) anxiety and possibly house prices. It would not reduce fuel prices, and jobs could be better created in energy saving and renewable energy projects. It is not worth their while, as any further drilling to get saleable gas would multiply all these objections and would be unforgivable in climate terms.

I further object to the validity of this consultation because the technical error on the online planning register referred to above may have reduced the number of objections that you will receive.

Regards,

Dilys
