Objection to Planning Application NY/2025/0030/ENV

Fracking in Burniston will not benefit the local community. The company involved will prioritize selling its resources to the highest bidder, rather than lowering energy costs for the affected residents of Burniston, Cloughton, or Scalby. This practice will have a detrimental impact on our countryside, wildlife, and their habitats. We have already experienced significant disruption from local construction, and this could further compromise our already fragile cliffs. Additionally, the influx of thousands of heavy goods vehicles transporting highly contaminated fracking fluids will create congestion as they navigate a sharp turn on a narrow road, leading to delays along Burniston Coastal Road.
