**Subject:** Objection to Europa planning application NY/2025/0030/ENV

Dear Sir/Madam,

Re: Planning Application NY/2025/0030/ENV

I write to object to the above application on the following grounds:

- 1) Climate change is at a critical point. Extracting gas leads to more CO2 and methane being burnt. As the UK transitions to clean energy more gas production is not needed, making this application redundant.
- 2) The proposed site is in a high tourist area, an industry which is crucial to the livelihoods of locals and of great benefit to the area. Tourists choose to come to visit the National Park which is close by, the coast and to enjoy the wildlife. All of which will be negatively affected leading to a decline in visitor numbers who will opt to go elsewhere.
- 3) The increase on the roads of HGV movements will only exacerbate the problem highlighted in point 2, as will both noise and light pollution which is an inevitable consequence of gas extraction.

I restate my objection to this application on the grounds listed above.

Yours sincerely

Glenys Sanders
