Subject: New comments for application NY/2025/0030/ENV
Date: 15 March 2025 11:38:56

New comments have been received for application NY/2025/0030/ENV from Mrs Elizabeth Stonehouse.

Comments:

The suggestion of drilling for gas fracked or squeezed is terrible when it's in a heritage coast site , close to houses and areas that have high volumes of radon gas that new builds should have a barrier against . The pollution from such an undertaking is unbelievable . Traffic which is already at breaking point on our roads would be even higher , small b roads are not built for large trucks . We already have a carbuncle on the coast being the mine that never was !! What an eyesore and the traffic day and night is horrendous , I live at the side of the A171 and can vouch for that , vibrating heavy trucks buses and cars !!

Scarborough council should not even be considering this planning application it's a disgrace !! The money the company will make will not stay in the uk , we won't get cheaper gas it will be sold on the world market , they lie ..

there are areas of the USA that are unlivable and water is shipped in in trucks for a few inhabitants due to pollution caused by gas fracking , bubbling rivers and pollution . Do we want that for our beautiful east coast or uk ? NO
