Subject: OBJECTION to planning application reference NY/2025/0030/ENV
Date: 15 March 2025 15:04:05

To whom it may concern,

I am writing to oppose the planning application for fracking along the North Yorkshire coastline.

My family has been holidaying along the Yorkshire coast for over 60 years and I have many treasured childhood memories of the area. I cannot believe that fracking is being proposed here. The potential damage to local communities and to the local and wider environment is immeasurable.

I am extremely concerned as a human being and a parent about the future of our planet and all of nature for future generations.

Here are some of the many reasons I am opposing:

Ruining the unspoilt views of the heritage coast

This is an area of outstanding natural beauty next to a national park, Europa plan to build a 100ft drilling rig which would ruin the landscape

Damage to wildlife & biodiversity

The vibrations from seismic testing, the pollution from the gas flares and machinery could disturb and harm birds and animals

Potential tremors and damage to the fragile cliffs

The area is above the Peak fault line and the cliffs are fragile. Europa plan to drill and fracture the rock for miles underneath the whole area - they claim their "proppant squeeze" technique is less dangerous than hydraulic fracking but it still involves fracturing the rock, which might cause earth tremors, subsidence, or damage to the cliffs.

Air pollution

The fumes from machinery, heavy goods vehicles and the CO2, sulphur dioxide and methane produced by the rig will pollute the atmosphere, ruining the air quality in an area close to popular walking routes, local schools and houses.

Noise pollution

The peaceful atmosphere of nearby properties will be ruined by the banging and drilling coming from the drill site.

Light pollution

The site will be floodlit 24/7 which will ruin the natural darkness of the coastal area and could drive away nocturnal birds and animals like owls and bats.

Increase in traffic from HGVs

Over 1000 heavy goods vehicles will have to travel on small country roads, causing noise, pollution and carrying toxic chemicals

Potential water supply contamination

To reach the gas, Europa have to drill through the natural underground water supply. If anything goes wrong with this, it could contaminate the water supply

Reduction in house prices

The rig will be visible for miles away (unlike at Sanddown in the south which Europa are using as their example to claim house prices won't be affected). It will be the first thing that comes up on an environmental survey, making it difficult for people to sell their homes

Reduction in tourism

The area depends on tourists who come for the peace, quiet and unspoilt views. This proposal could adversely affect the area's biggest economy.

No reduction in UK or local gas bills

Europa plan to sell the gas on the open market - it won't be available locally and won't reduce gas bills. The gas will financially benefit Europa and their shareholders, not residents.

Fossil fuels cause climate change

Europa plan to continue drilling for 20 years, the emissions from the burning of the gas they plan to extract will further add to the climate crisis, wrecking the planet for future generations.

Please, do NOT allow this fracking to happen.

Many thanks,
