342, Scalby Road.
North Yorkshire.
YO12 6ED
Case Officer Amy Taylor.

Dear planning.

I object to the proposed drilling in Burniston.

It is with much regret that once again the local people are having to voice their concerns, worries & most of all their own well being & mental health in what is a disaster waiting to happen with catastrophic results to everyone & our natural environment, if this ludicrous, drilling for gas in Burniston, is to go ahead.

I live on Scalby Road & it affects our mental health with the already relentless noise pollution from HGV's travelling past our home never mind the air pollution.

In this 21st century we should be looking at recycling waste to turn into fuel, for our children's future & well-being.

Just please remember how precious our Earth is & respect the people & the environment by thinking of developing more safer ways in providing cleaner energy.

Man's continuous obsession to drill to great depths is definitely causing imbalances with Earth's climate changes.

We owe this to the future of all our children.

Mrs E Shortle.
