To North Yorkshire Planning Control.

I wish to lodge my objection to the proposed Fracking exploration around the Burniston area.

Such a project flies in the face of all efforts to decarbonise. It would contribute untold damage to the area, and I hope that Planning officers will see that. Refusing permission would give much needed hope that the power of the fossil fuel lobby is not absolute. It would be a great triumph for the Authority to show its ability to protect the area from the damage that the pursuit of Fracking inevitably causes.

Yours faithfully
Kieran Clenaghan
