Subject: New comments for application NY/2025/0030/ENV

Categories:

New comments have been received for application NY/2025/0030/ENV from Mr Mark Rowe.

Comments:

I wish to register my objection to this proposed temporary well site based on the environmental impact it may bring. Burniston is a small village already suffering from an over used poorly maintained transport infrastructure, the addition of this proposed well site can only make things worse with its 12 hour working day and 15 to 20 daily HGV's. In addition to the transport impact the effects from the drilling process on our homes and local environment are largely unknown and likely be to their detriment.
