---

I am writing in connection with the above planning application made by Europa Oil and Gas for the construction, drilling & testing of this site to extract gas through propane squeeze procedure

I wish to object for the following reasons

**The drilling site is directly  
above a major fault system  
underground (Peak Fault)  
which increases the  
likelihood of**

**UNDERGROUND  
TREMORS**  
(earthquakes)

# CLIMATE CHANGE

- Climate change is at a **CRITICAL POINT**.
- Burning gas = **more CO<sub>2</sub> + methane**
- Other UK gas sites shut down due to **downstream emissions** (gases).
- **UK is moving to renewable, clean energy** - we don't need more gas production.

# TOURISM

- **Devastating our beautiful countryside,** Heritage Coastline & Cleveland Way.
- **Only 1km** from National Park & close to **weak cliffs.**
- **Damage to wildlife, birdlife and Site of Special Scientific Interest (SSSI)**
- Probable **decline in visitor numbers** affecting businesses.
- **Local opinion should matter.**

# POLLUTION

- **Deafening drilling, dust and light pollution 24/7.**
- **Gas flaring** - toxic fumes and horrid smells.
- **Our water supply** may be at risk.
- Adverse impact on **mental health**.

# INDUSTRIAL DEVELOPMENT

- **Precious farmland destroyed**
- Drill site **very close to** homes and rural village.
- Possible **20 years** production of gas and **4 further rigs**.

Yours sincerely  
Pam Wardle
