Europa Oil and Gas application for appraisal drilling at Burniston Mill Site.

Dear Amy

I am emailing in relation to the above planning application made by Europa Oil and Gas for the construction, drilling and testing of this site to extract gas through a prop-pant Squeeze process.

After considering the evidence and information. I wish to object.

I used to live in Cloughton and left just over a year ago. I return regularly to now holiday and do so for the beautiful unspoilt area, coastline fresh air and tranquility. Indeed the Cinder path was named in the Telegraph during covid as one of the 10 best places in the UK to find peace tranquility and healing.

Since hearing about the proposed fracking project I must take action and support the community in the fight to stop this.

The process is

1. A Pollutant with potential to cause physical and mental health problems. Light pollution, affect the water supply and produce toxic fumes and smells.
2. Farmland destruction. Drill site an eye saw and close proximity to houses and tourist attractions.
3. Stripping the beauty of the beautiful countryside affecting the Cleveland Way and a potential to discourage tourism and affect income and business in the area. Another peaceful place taken over by industrial sites.
4. Potential earth tremors and climate change . Both that are being highlighted worldwide.
5. Uk moving to renewable energy so why more gas production.?
6. Potential to take over the whole of the coastline and make the area an unpleasant unhealthy place to be and so close to the National Park.

I hope that my concerns are taken seriously by the planning committee during the review process together with the many other objections that you will receive.

Yours sincerely
Ms Alison Marshall
