To whom it may concern,

We are residents in Burniston writing to object to the above application by Europa to frack in our village.

This is a relatively small village in a beautiful rural location which will undoubtedly be affected by this industrial monstrosity. In fact it will impact more than just our village but also neighbouring villages of cloughton and scalby. How this is even being considered is beyond us.

My first concern is the impact on public health from polluting effects of the gases released into the air and the impact on local water ways. There is a local preschool and primary school, as well as parks where our children play. This is a safe village where children play out and locals and tourists walk and cycle.

Secondly the impact on the local environment will be huge. This is a heritage coastline which is full of biodiversity and must be preserved. The risk to wildlife and cliffs from pollution and drilling will be significant. The site will be an eyesore and will be visible for miles. The additional traffic and HGVs from the proposals will add greatly to the pollution.

Our small beautiful village will become an HGV highway, making it dirty and noisy.

The noisy and light pollution is also a worry.

Thirdly we are concerned about the impact on our house prices. Having just moved to the area because of the beauty of all it has to offer, we are really worried that the value of property here will fall if fracking is allowed in Burniston.

Overall, this is home to so many who love and cherish these villages. Fracking on this industrial scale does not belong here. Fracking on a global scale should not belong anywhere given the current climate crisis we are facing.

Please do not allow our unspoilt, safe, countryside and villages to become an environmental disaster. For the sake of our health and children's future.

Yours sincerely

Elizabeth and Daniel Amos
