Good morning Amy.

I feel as though I must strongly object to the planning application NY/2025/0030/ENV.

I am a local resident and My family worked in the Alum mines, Agriculture and the fishing industry at Robin Hoods Bay and Ravenscar in the 1800.

I now live in Burniston which is a small town full of incomers who find they cannot settle here.

Like Scarborough , Burniston has lost its identity.

I am not going to dwell on the large number of objections to this application which have already been presented.

The Manipulative planners have chosen not to acknowledge these concerns.

My plan of action is to do everything I can to withhold payments of the Council Tax Bill.

This house I live in is becoming an uncomfortable home due to the local animosity that already exists from incomers. There is Light pollution and Heavy goods wagons associated with the animal Feed mill at the well site, heavy traffic and pollution caused by Woodsmiths mine, Negative costs of Visitors and traffic to the area, Air traffic pollution and noise, At times the awful stench of Sewage and general air pollution and The demands of the Retirement and nursing homes rule the area. etc, etc.

I am aware of the world wide concerns about the actions of incompetent planners and Government bodies in Scarborough who put money and their incomes above all else. The confidential document I have received on this matter is a real eye opener and contains some strong advice on the actions we must take.

As a 78 year old resident and large family member I have no wish to put myself or others at risk, but the activities of the criminal element which dominates local politics must be addressed.

Bob
