---

As a resident of Scarborough I wish to complain against this planning application on the following grounds

The adverse Environmental impact of the following

- 1 Contamination of drinking water sources
- 2 The use of the extracted fuel will result in generating greenhouse gases
- 3 The use of fuel to perform the extraction will add to the generation of greenhouse gases.
- 4 The use of fuel to power Heavy Goods Vehicles that supply the site will add to the generation of greenhouse gases.
- 5 There will be additional congestion on the roads to and from the site in Scarborough and the route to Scarborough creating additional greenhouse gases.
- 6 There will be damage caused to the road surfaces in Scarborough and the route to Scarborough.

In addition there will be a negative impact on the economy of Scarborough due to the congestion along the route to Scarborough discouraging tourists.
