I am a resident of Scarborough and I wish to complain against this planning application on the following grounds

Firstly further time should be given to object to this application due to the problems with the planning portal. I would like it to be confirmed you have received and noted my objections.

The impact on the Environment in an area of natural beauty.

- 1 Contamination of drinking water sources.
- 2 The use of the extracted fuel will result in generating greenhouse gases
- 3 The use of fuel to perform the extraction will add to the generation of greenhouse gases.
- 4 The use of fuel to power Heavy Goods Vehicles that supply the site will add to the generation of greenhouse gases.
- 5 There will be additional congestion on the roads to and from the site in Scarborough and the route to Scarborough creating additional greenhouse gases.
- 6 There will be damage caused to the road surfaces in Scarborough and the route to Scarborough.
7. Profits will go to the company and not benefit anyone locally or nationally.

Additionally who will be responsible for any damage that is created by the company if it then goes bankrupt to avoid their responsibilities, the council??

In addition there will be a negative impact on the economy of Scarborough due to the congestion along the route to Scarborough discouraging tourists.
