Objection to Planning Application NY/2025/0030/ENV

I object to the application because:

- Pollution, not just the noise and light pollution but as the fumes from the site and the trucks going to and from the site
- it sets a precedent, if this can get passed, being so close to vulnerable coastline and the North Yorkshire Moors then they'll be able to do it anywhere
- it will be an eyesore, being very close to both the Cinder Track and the Cleveland Way, tourists and walkers won't even be able to enjoy nature without hearing and seeing the drilling
- shouldn't we be moving away from Greenhouse gases? Fair enough if it was a field full of solar panels but this is a step in the wrong direction
- the risk of Earth tremors too, again being so close to eroding cliffs, this will only make the situation worse, along with being so close to the village and the potential damage to housing structures.

Thankyou.
