---

New comments have been received for application NY/2025/0030/ENV from Ms Kasha Button.

Comments:

This proposed development is totally inappropriate for Burniston and will have no benefit at all for local people living near the site who will be most adversely affected. I object on several grounds; fracking/proppant squeeze extraction contributes to climate change and should be banned; the potential for noise, lights and air pollution from drilling/extraction; the potential for toxic chemicals to leach into our waterways; the increase in HGVs on already busy, narrow roads; the unknown risks (eg earth tremors) and the resulting associated decline in house prices; the negative impact on tourism if a beautiful part of our countryside is spoilt by industrial development and also the proximity of the site to homes. Drilling to extract more fossil fuels will not lead to cheaper energy or increase energy security, it will merely generate revenue for Europa Oil & Gas.
