Dear Amy Taylor ,

I am shocked and stunned that the Fracking in Burniston is going ahead , with the commitment to green energy in the UK this is a massive step backwards !!!

The pollution and disturbance of the fragile geology in the area is going to effect not only the resident population but the wildlife too .

How on earth does this company get past planning when some people cannot even get planning for a shed . !!! I hope this plan is overthrown for the sake of the area and its people .

Thankyou

Annabel Hayes
