Europa Oil and Gas Application for Appraisal Drilling at Mill Site Burniston

Dear Ms Taylor,

I am writing in connection with the proposed proppant squeeze application, made by Europa Oil and Gas for the construction of drilling and testing . Having fully considered this I wish to place several objections.

1. As I live very close to the proposed site I am anxious about the amount of dust, light and noise pollution, the toxic fumes from the burn off and the risk of contamination to our water supply.
2. Our wonderful coastline and countryside will be damaged and there will be a negative impact on the wildlife and the crops that are grown in this area.
3. Many properties in my area were built before oversiting and radon barriers became common practice therefore my home and others have no protective barrier against any gas leakage which could come up into our homes.
4. The increased traffic of HGVs will impact on the area causing pollution and noise especially during the night.
5. I am concerned about the stability of the cliffs nearby as there has already been plenty of cliff eroision along this coast.

I hope you will take seriously all these points into consideration when making a dicision about the above planning application.

I do NOT want my name and address made public.

Yours sincerely
