Subject: Drilling at Burniston
Date: 19 March 2025 14:21:03

We are writing to object to the proposed plan by Europa Oil & Gas to drill for gas in Burniston. This would cause considerable disruption to the villages of Burniston, Cloughton and Scalby.

In an age where major considerations are being given to climate change, there is a need for clean energy, not for more CO2 emissions and pollution.

Our coast is a tourism hotspot, with beautiful landscapes and seascapes, together with plentiful wildlife on land and sea. A development such as the proposed Europa one would devastate our countryside. The effect on the lives of the local population is incalculable.

Surely the voices of the people should be heard, and the relentless quest for profit silenced.

Lorna & John Holborn
