Dear Planning Dept.

I'm objecting the application for Proppant Squeezing which is basically the same as fracking which will allow any gas and Methane to escape elsewhere and beyond the catchment area. Which would harm our precious environmental area of the North Yorks Moor and North Yorkshire as a whole, the Labour Government did promise that there will be no Fracking allowed while they are in power. Also the coastal region is rather fragile to erosion as seen recently.

Yours Jarvis Browning
