To whomever it may concern

Re Planning application objection NY/2025/0030/ENV

I would like to file an objection to the above planned application for proposal of a fracking site at Burniston. As a local resident I do believe this would be disastrous to the local environment and community where families live and wildlife thrive. It would cause irreversible damage to wildlife and biodiversity as well as causing all manner of pollutants harmful to all. There would be increase in traffic from HGVs, noise pollution from machinery and damage to the environment, through exploitation of fossil fuels and emissions. The landform here is already in a fragile state and this would only serve to accelerate this, making it too dangerous to access a much-loved area. There is also the potential for contamination into the water supply, by drilling through the natural water supply. There is high risk of ruining the natural beauty of the area, something which current and previous generations are proud to have been brought up here and have as their heritage.

It is my and others in our household's opinion that there would little to no benefit for the local community and would be disastrous for the issue outlined above.

Regards

Dr Catherine Turner, local resident
