Thursday, 13th MARCH, 2025

DEAR MS TAYLOR.

- I'm writing to object to the plans of "EUROPA OIL AND GAS" to drill on the coastline in the vicinity of BURNISTON and CLOUGHTON.

- My understanding is that the application regarding this proposal by the company/organization concerned is: -

NY/2025/0030/ENV.

- (But please CROSS-CHECK that I've noted the above reference number correctly - "Thank you").

- I have various concerns regarding such drilling for gas & accompanying activities in the vicinity of Burniston & Cloughton - issues such as road safety if large (or maybe extremely large) numbers of H.G.V.'s come onto local & narrow roads; ^{possible} pollution (regarding noise & the emissions of other pollutants) the proximity of such drilling relatively close to people's homes thus potentially very adversely affecting their quality of life & stress levels; possible earth tremors caused by drilling over coastal geological faults, the possible results of gas drilling near weak cliffs, possible negative effects on bird-life & wild-life generally. There might also be effects on the local water supply, Tourism & local businesses could also be negatively impacted.

- It's also been made aware that such gas drilling activities could go on for 20 years or so. Freshwater farmland could be adversely affected.

- As a result of all these potential negative factors in an area where people & wildlife live I object strongly to "EUROPA OIL AND GAS" company's plans to drill for gas & related activities in the vicinity of Burniston & Cloughton.

- THANK YOU FOR READING THIS LETTER.

YOURS FAITHFULLY
