---

To whom it may concern,

I am writing to object to Europa Oil & Gas plans to create what could be "the largest onshore gas field in the UK" in Burniston, at the northern edge of Scarborough.

This goes against our climate commitments to decrease fossil fuel dependency, it would be a massive step backwards.

As it is fracking by stealth it is unacceptably dangerous for the environment due to noise pollution, dust pollution, toxicity, and fatal risk to clean water supply. Shockingly the proposed target area is over a fall line so like to cause tremors / earthquakes - as happened in poor Lancashire.

I am a resident of Yorkshire and visitor to Scarborough and do not wish it to be tarnished by this type of activity. I learnt to walk in Scarborough, it should be a refuge for children and older population who live there and the families who visit. The heritage coastline, wildlife, clean air, clean water and nearby National Park should all be protected for everyone.

Best wishes,
