This is absolute madness! You need to research the damage fracking has done to communities in the US. The health implications are horrific. You the Council and your residents will be paying for the damage for years. The incredible waste and contamination of water will have devastating effects on your community, your countryside and your wildlife. Never mind the other potential risks of the extraction process.

Before you decide, everyone on your Council needs to read this:

Environmental Health Concerns From  
Unconventional Natural Gas Development  
[oxfordre.com](http://oxfordre.com)

Please make the right decision.

Some people dislike wind farms but, in comparison to the long term effects of fracking, there will be no contest.

Sincerely yours

Mrs CA Stack
