---

New comments have been received for application NY/2025/0030/ENV from Ms Laura Garforth .

Comments:

I object to this proposal on two grounds. Firstly, gas extraction is totally counter to the urgent need for concerted climate action. As a nation we are transitioning to clean energy and there is simply no place in the age of global warming for more gas extraction. This is contrary to government policy and anathema to anyone who is concerned about the future of humanity and our planet. Secondly, as a local resident I am horrified by the potential impact on our heritage coast including noise, light and dust pollution, increased traffic, unsightly visuals and the potential for toxic fumes. I cannot understand why this is even being considered in an area of outstanding natural beauty which relies on tourism and so close to the protected national park.
