Subject: New comments for application NY/2025/0030/ENV
Date: 22 March 2025 22:41:56

New comments have been received for application NY/2025/0030/ENV from Miss Rosalyn Rayment.

Comments:

There are many reasons that are factoring into my objection which can be summarised as below:

1) climate change

We are at a key, pivotal point. Why are we investing in more damaging fuels and not in renewables? This seems like backwards thinking from our council and planning department

2) pollution

In the form of dust, light and sound pollution. Plus the additional impact of construction vehicles and impact on local air quality.

3) environment

On the fringes of the national park, near beautiful (but fragile) cliffs and disturbing vital farmland and habitat.

Again, why are we investing in something which is so damaging to our local environment?!

4) infrastructure

Hundreds of HGVs driving along small country roads, through a small village has the potential to be incredibly dangerous to residents, school children and wildlife. We haven't even got a dual carriageway/decent road to York, yet this proposal is getting more legway than improving vital links to our nearest city.
