**Subject:**

Dear sir/madam

I am writing to you as I'm very concerned to hear of the plans to frack in Burniston.

I feel this will have a very negative impact not only on the lives of residents but also on the wider environment and wildlife . You must consider the impact the increased lorry traffic will have on small roads with lots of corners, and an infrastructure which really isn't up to the job. The increased traffic will lead to more harmful emissions and noise, negatively impacting residents lives. The roads already struggle to cope with extra holiday traffic in the Summer, and a fracking area will act as a deterrent for tourists to the area. The pollution and environmental harm created by the fracking process should not be allowed to take place on the edge of a national park, or near a wonderful seaside resort.

It is the wrong place to have a fracking plant. We need to protect our local environment.

Yours faithfully  
Clare Hudson
