Subject: New comments for application NY/2025/0030/ENV

New comments have been received for application NY/2025/0030/ENV from Mrs Sylvia Terry.

Comments:

I am extremely worried about this, the effects on our water supply, the amount of Lorry's in the village, the possibility of earthquakes and unwanted noise, light, pollution, vibrations, smells, subsidence and spoiling a beautiful part of the world. Effects on tourism in the area which people here rely on and what effects on wildlife, flora and fauna in the area and the stability of the cliffs so close to the coast. I live only metres from the proposed site as the crow flies, I am in the National Park here and it also worries me what effect this drill site will have on my animals, cows and horses who are sensitive to vibration to say nothing of when riding the horses who are easily spooked and not used to heavy traffic. Also the effect on the value of my property, the initial drawings went right under my house and how will anyone know what direction they will explore. I would imagine 360* from proposed drill site. What damage would it do to my property ? I Thought the vision was more green energy not more fossil fuel. Please take this as an objection to this proposal Thank you
