Subject: New comments for application NY/2025/0030/ENV

New comments have been received for application NY/2025/0030/ENV from MR WILLIAM TERRY.

Comments:

I object to this application, as an owner of a borehole, which is the only source of drinking water for myself and livestock, like many other rural properties in the area, who rely on springs and boreholes for the basic of clean water. Propellant Squeeze techniques of Gas extraction, risk contamination of underground aquifers.
