Subject: New comments for application NY/2025/0030/ENV

New comments have been received for application NY/2025/0030/ENV from Mr Warburton Knight.

Comments:

I am writing to formally object to the proposed gas drilling project by Europa Oil & Gas near Burniston, as outlined in planning application NY/2025/0030/ENV.

This project poses significant risks to our environment, community, and heritage. The drilling site is alarmingly close to residential areas, which raises concerns about noise pollution, air quality, and potential health impacts on local residents. Furthermore, the industrialization of this area threatens the natural beauty and ecological integrity of our heritage coastline, which is a vital asset for tourism and local biodiversity.

The extraction and burning of fossil fuels are major contributors to climate change. Approving this project would contradict our collective responsibility to reduce greenhouse gas emissions and transition to sustainable energy sources. Instead of investing in outdated and harmful practices, we should prioritize renewable energy solutions that align with our environmental goals.

I urge you to reject this application and protect our community and environment from the long-term consequences of this project.
