Subject: New comments for application NY/2025/0030/ENV

New comments have been received for application NY/2025/0030/ENV from Ms Deborah Thurlow.

Comments:

I want to object to this planning application as I have deep concerns about the potential damage that could be caused to the local environment. The site is very close to the heritage coast which is a much needed and valued place for people to visit and enjoy. Not to mention the locals who will have to live with huge disruption. I am concerned about the visual intrusion, dust, noise and light pollution.

I am also very concerned about the plan to use this site for 20 years of production if this initial exploration is successful for Europa. As a mother I am against any new developments in fossil fuels as we see atmospheric levels of CO2 continue to rise. The impact on the climate is clear to see and I would implore you to not agree to this application so we can better protect the future of the planet for our children.
