**Subject:**

Dear North Yorkshire Council,

I'm writing again as I don't think my full message sent previously.

My name is Clare Martin and I live at 23 Dell Field Close, Berkhamsted, HP41DS.  
I'm writing to object to NY/2025/0030/ENV the proposed fracking site in Burniston.

I can't believe this is even being considered as it would be detrimental to the countryside in an area of outstanding natural beauty and the lives of local residents.

We must protect nature and biodiversity at all costs as we are in a climate emergency!  
Vibrations from seismic testing and pollution from gas flares and machinery could disturb wildlife.

The nature of fracking could cause tremors which could lead to subsidence and damage to the cliffs

Fracking can contaminate water supplies

The increased HGV traffic to the area will cause pollution and disturb local residents.

This site is really going to make local residents lives a misery!

We should be looking at renewable energy sources such as solar, wind or tidal instead of extracting gas that will contribute further to climate change.

Please please do not let this fracking project go ahead it will ruin this beautiful area.

Kind regards  
Clare Martin
