Amy Taylor - Case Officer

I am writing concerning the above Planning Application that has been made by Europa Oil and Gas for the construction, drilling and testing of this site to extract gas through a proppant squeeze process.

Having considered this, I wish to object for the following reasons:

- 1: Climate Change - why in a world which is moving away from fossil fuels is there a move to extract more! Time and money should be spent on renewables. Wind power is an obvious choice leaving gas in the ground.
- 2: This is a tourist and agricultural area. Noise pollution, Light pollution and increased traffic with HGV's will have a negative impact on these. The polluted water impact is not known.
- 3: The roads around this site are already too busy and exiting at Station Road at the tennis courts or at the other end at Field Lane by the campsite is already dangerous. Less traffic not more is required.
4. Having looked into the matter - it doesn't matter if it is called proppant squeeze it is the same as fracking just disguised by another name. We don't want it.

I really hope that my views and concerns are fully taken into account.

Janet Jenkins
