**Subject:** New comments for application NY/2025/0030/ENV

New comments have been received for application NY/2025/0030/ENV from Mr John Bell.

Comments:

1. We are in the middle of a worldwide climate change emergency and I can see no case or justification for this fracking venture
2. There is a credible risk to groundwater contamination from the introduction of proppant chemicals which would be impossible to control or reverse reverse. Our country is too densely populated to be able to sustain even one contamination failure
3. Similarly, there is a known risk of geological disturbance which could have far reaching consequences for our small island.
