**FAO: Ms Amy Taylor**

I wish to object to the proposed plan to drill for gas in the areas stated in the Planning Application above.

The siting of a drilling rig in a village will be very unsightly, noisy and its operation extremely disruptive.

The drilling and method of extracting the gas is very disconcerting and causing a lot of anxiety to many people.

The implications that this proposal pose are great and could and possibly will, cause untold damage to foundations of properties, utility services, drainage and sewage pipes. Thus, is an unnecessary Capital Venturist Mickey Mouse plan.

There is a strong possibility that any move to undertake this plan will meet with protest and I suspect civil disobedience.

Feelings are running very high in the areas where drilling is proposed and I wouldn't rule out Vigilantly Groups being formed.

This is not a threat by me but a statement of fact based on comments and conversations I have heard.

I wish my comments to be placed before the Planning Committee and I appeal to them to reject the proposal in its entirety.

Many thanks.

Kindest regards,

Major (Retd) B C Wilson RE  
Late Corps of Royal Engineers
