Dear Amy

I am writing to object to the proposed proppant squeeze ref NY/2025/0030/ENV at Burniston near Scarborough by Europa Oil and Gas.
As a frequent visitor to the area I was appalled to hear of the proposed plans.
Here are the reasons why.

1. Local heritage coastline.

The massive impact on the coastal road would be huge. The road wasn't built to take large hgv vehicles and will cause the build up of traffic with vehicles turning on and off the road to the site. This will have an impact on tourism. I myself will not visit as frequently. I am also a keen cyclist and this will definitely put me off travelling over to this area.
The site will also have an impact on the wildlife and plants in the area. We are supposed to be conserving not opposing. The intrusion of noise, dust and toxic fumes will no doubt impact the wildlife.
Where will the polluted water go ??

2. Tourism.

The above reasons will all undoubtedly affect tourism.

3. Traffic.

Again as outlined above the coastal road was not built for such volumes of large vehicles. The road through Burniston especially near the Three jolly sailors would be an accident waiting to happen for other road users and pedestrians alike.

4. Seismicity in the area.

I live in Lancashire and am only too aware of what happened here when similar investigations were started. This would be catastrophic to residents and businesses in the area which would undoubtedly affect tourism.

I very much hope you take my objections into consideration.

Thanking you in anticipation of your help with this matter.

Yours truly

Gillian Walsh
