Re Burniston Fracking proposal

I should like to log my objections to the proposed fracking in Burniston. This is on the edge of the NY moors national park and is going to cause a series of unpleasant side effects such as noise and pollution, not to mention the disruption to local farms and residents close by.

In an era where EVERYONE should be looking at renewable energy and being so close to the huge sea area, this is not a project we should even be considering.

NY have already deterred second home owners through the additional taxes and this is just another reason why tourists may stay away from the area. This may then go on to impact local businesses.

Please please reconsider as the chances of earth tremors in a coastal region are not just a slim possibility but a real threat.

Regards

Rosemary Milner
