**Subject:**

Do not frack, inefficient and ineffective

**Date:**

---

Dear all,

Please do not allow fracking. If you read up on this, you will see that lots of fracking in the continent of Europe has been stopped because of problems with tremors caused by the fracking and gas entering the water table.

Near Blackpool there was permission given over 5 years ago (2017/6 approx) and it stopped due to the above problems.

Local people and the local council were against it.

Do not be like the Tories and make your constituents upset, listen to them and avoid this expensive and inefficient mess.

Thanks for reading,

Lucy
