Subject: New comments for application NY/2025/0030/ENV
Date: 29 March 2025 21:38:19

New comments have been received for application NY/2025/0030/ENV from Mrs Jane Tully.

Comments:

I do feel this should not go ahead with the planning application for drilling in this area. Lots of nature & wildlife in this area. These could be decimated with all this extra traffic & potential for pollution from the large vehicles that would be needed to get the sight up & running.

The increase in traffic would not be desirable for such a small village. The roads around Burniston & Cloughton are not big & lots of parked cars on those roads.

The weather can be poor during the winter months prompting further issues for the residents trying to get about the villages.

The A64 is already very busy with holiday traffic & commuters. If these plans are approved this will make the A64 even busier the potential for many more accidents.

If traffic came down from Whitby the roads again are not suitable for such an increase. The facilities in Burniston & Cloughton are not enough to provide for extra personnel visiting the site.

Scarborough & the North Yorkshire Moors are tourist areas. This could effect the visitor numbers to our beautiful area.
