Subject: Potential Fracking in Burniston
Date: 31 March 2025 12:27:39

Dear Amy Taylor,

I'm e-mailing you today as I'm very concerned about the potential fracking in Burniston.

I know these people say there won't be any risk but we all know this is just guessing as in the past there certainly have been problems. The pollution this will cause in so many ways is just not acceptable and when you take in to account climate change and tourism this just isn't the answer to our energy needs. There are much safer ways such as wind and tide. Please reconsider this scheme as this area as a hole is beautiful and not only that but in the summer months it's almost grid locked as it is, so with all the extra traffic it will become a nightmare.

Please don't let this happen it will be the ruin of Scarborough as a hole.

Kind regards,
Peter Northedge
