Dear Councillor

Fracking /propellant extraction on the North Yorkshire coast is madness.

I am a regular visitor to burniston and Scarborough.

The roads will be jammed with the heavy Lorries, the roads are already difficult for residents and visitors, fracking needs huge numbers of lorries that bring sand and materials, there is a risk to groundwater and contamination of water our supplies, the rigs will be an eyesore in an area of natural beauty.

We need to stop using fossil fuels our planet is already suffering, our children will never forgive us if we continue to destroy our world.
