ATT Amy Taylor

I write to object to the proposed drilling for oil and gas near the villages of Burniston, Cloughton and Scalby. I am appalled that the application has been even allowed to be submitted. Action for climate change is at a critical point, and this is in direct contention with the UK's aims for renewable clean energy. Even exploratory action would cause unnecessary pollution (contaminated water and CO2 emissions etc) to what is a beautiful part of our natural heritage.

Please do not allow this to proceed here or anywhere.

With regards

Julie Shepherd
